

The NAB needs to leave satellite radio ALONE!! The content of FM has gotten SO deplorable and littered with nonsense and commercials and constant "chatter" that it is no longer a useful medium. The MERE FACT that a FREE service is feeling threatened by a PAY service is example of this. They are fully aware that there content "sucks". What good is a traffic and weather report when by the time they actually get to the report your already stuck in the traffic jam because it took them forever to get to it. And the reports are NEVER complete either.

With satellite radio.. I turn to the traffic/weather channel WHENEVER I need it.. and the information I need is there NOW at the time that I need it when I'm on the road or on the freeway... no commercials, no babble. It is as simple as that. and I happily PAY for this service and the priviledge of receiving it.

It's amazing that the NAB has the nerve to want to restrict a pay service because their own content is SO BAD that they can't give it away... and SO BAD that WE finally have a FREE-to-CHOOSE alternative that we gladly PAY for!

They simply have no right!!

PLEASE DO NOT SUPPORT THE NAB'S REQUEST!!

Thank you!
